Seeking a Full Stack Java Developer role to apply Java, Spring Boot, cloud and microservices expertise in building scalable, high-performance enterprise applications.

SYNOPSIS

- An accomplished **Full Stack Java Developer** with **4.7 years of professional experience** at **Tata Consultancy Services (TCS)**, delivering reliable and scalable enterprise applications across **microservices and cloud-native architectures**.
- Strong expertise in **Java, Spring Boot, Spring Batch, RESTful APIs and Angular**, with proven experience in **modernizing backend systems** and **Spring Framework upgrades**.
- Hands-on exposure to **AWS (ECS, S3, CloudWatch, Batch)** and **GCP (Compute Engine, Cloud Storage, VPC)**, along with solid skills in **PostgreSQL and SQL optimization**.
- Demonstrated ability to improve **application performance, memory efficiency, and CI/CD pipelines** through collaboration with **DevOps teams** and adherence to **Agile best practices**.

EXPERTISE | TECHNICAL SKILLS

- **Java & Multi-Language Development**: Java, Python (Basics), SQL, Object-Oriented Programming, High-Performance Code, Clean Code Practices
- **Enterprise Backend & Batch Processing Systems**: Spring Boot, Spring Batch, Microservices, RESTful APIs, Backend Engineering.
- **Full Stack Web Application Development**: Angular, HTML, CSS, REST Integration, Frontend–Backend Integration, Responsive UI
- **Relational Database Design & Optimization**: PostgreSQL, MySQL, SQL Queries
- **Cloud-Native Engineering on AWS & GCP**: AWS ECS, AWS Batch, S3 Bucket, CloudWatch, GCP Compute Engine, Cloud Storage, VPC.
- **CI/CD Automation & DevOps Practices:** Jenkins, Git, Bitbucket, CI/CD Pipelines
- **Monitoring, Logging & Production Support**: ECS Log Analysis, CloudWatch Monitoring, Incident Reduction, Root Cause Analysis, System Observability
- **Agile Delivery & Project Execution**: Agile Way of Working, Sprint Planning, JIRA.
- **Service Management & Operational Support**: ServiceNow (Basics), Ticket Analysis, Production Issue Resolution, SLA Compliance
- **Development Tools & API Testing**: Visual Studio Code, Eclipse IDE, Postman, API Validation, Debugging Techniques, Amazon Q, AI-assisted coding tools.

CORE COMPETENCIES

- Full Stack Application Development
- Spring Boot Microservices
- Backend System Modernization
- REST API Development
- Working with Agentic AI like Amazon Q
- Spring Batch ETL Pipeline Development
- Agile & Scrum-Based Delivery
- Cloud-Native Backend Development
- Performance Benchmarking & Optimization
- Cross-Functional Stakeholder Collaboration
- Code Quality, Reviews & Best Practices

PROFESSIONAL EXPERIENCE

TATA CONSULTANCY SERVICES (TCS)
FULL STACK JAVA DEVELOPER | Fab 2022 – Oct 2026

Roles & Responsibilities:

- Led the **End-to-End modernization of a critical Spring Batch application**, migrating the backend from **Java 8 to Java 21** and upgrading the **Spring Framework**, resulting in a more scalable, maintainable, and future-ready architecture.
- Designed and implemented **End-to-End Spring Batch processing pipelines** to ingest **tilde-delimited files**, perform complex business logic transformations, and generate structured **XML payloads** for downstream systems.
- Developed integration with **Avalara E-Invoicing APIs**, enabling automated transmission of invoice data, response handling, and persistence of transaction results in the database for compliance tracking and audit purposes.
- Implemented **data parsing, transformation, validation, and mapping logic** to convert flat-file input data into compliant XML structures required for external E-Invoicing systems.
- Conducted **performance benchmarking, regression testing, and compatibility validation**, ensuring **zero-downtime deployments** and seamless backward compatibility across production releases.
- Collaborated with **CI/CD and DevOps teams** to optimize **Jenkins pipelines, Docker configurations, and build workflows**, reducing build and deployment time by **25%** and improving release reliability.
- Designed and developed **Spring Boot microservices** supporting high-volume **monetary and non-monetary transactions** on an **AWS-hosted enterprise platform**, improving overall transaction throughput by **30%**.
- Monitored **AWS ECS and CloudWatch logs** to identify operational risks, strengthen system observability, and reduce incident response time.
- Provided **production support and incident management**, performing root-cause analysis for high-priority issues and maintaining high system availability and service reliability.
- Followed **Agile development practices**, actively contributing to sprint planning, development, code reviews, and delivery cycles, helping improve project delivery timelines.

PROJECTS UNDERTAKEN

- **Java 21 Migration:** Led application upgrades to Java 21, ensuring compatibility, improved performance, and seamless transition with minimal production disruption.
- **Spring Batch Development:** Designed and implemented end-to-end **Spring Batch applications** for high-volume data processing, including reading **tilde-delimited files**, performing business logic transformations, and generating structured **XML payloads**.
- **External API Integration (Avalara E-Invoicing):** Integrated batch processing workflows with **Avalara E-Invoicing APIs** to transmit invoice data, handle responses, and persist transaction details in the database for audit and tracking.
- **Data Transformation & Mapping:** Implemented complex **data parsing, validation, and mapping logic** to convert flat-file data into compliant XML structures for external system integration.
- **Query Optimization & Performance Enhancements:** Optimized SQL queries and backend logic to improve application performance, response times, and batch processing efficiency.
- **Production Monitoring & Support:** Monitored production systems, analyzed logs and performance metrics, and resolved issues to ensure high availability and stable batch processing operations.

EDUCATION | CERTIFICATIONS

- **BE / BTech** – Sagar Institute of Research & Technology (SIRT), Bhopal | **2021**

Certifications & Professional Training

- **Google Certified Associate Cloud Engineer** — Issued by Google Cloud
- **Google Certified Professional Data Engineer** — Issued by Google Cloud
- **Java Bootcamp Certification** — Issued by Let's Upgrade *(Under NSDC)*
- **Core Python Programming Internship** — Issued by Appin Technology, Bhopal, Madhya Pradesh
- **Machine Learning & AI Workshop** — Issued by MANIT, Bhopal, Madhya Pradesh

SOFT SKILLS

- Excellent Communication
- Team Management
- Collaborative & Cross-Functional Work
- Effective Problem-Solving
- High Adaptability in Dynamic Environments
- Strong Attention to Detail

PERSONAL DETAILS

- **Date of Birth:** 12 August 2000
- **Languages Known:** Hindi & English
- **Address:** Bhopal (MP)
